## About Punjab Vidhan Sabha

Punjab Vidhan Sabha, officially known as the Punjab Legislative Assembly, stands as a proud symbol of democracy, governance, and the rich cultural legacy of Punjab. As the unicameral legislature of the State of Punjab, it represents the collective voice, aspirations, and democratic spirit of millions of citizens across the state.

Guided by democratic values and public responsibility, the Assembly plays a vital role in shaping policies, enacting laws, and driving the progress and welfare of Punjab. The tenure of the Legislative Assembly is five years unless dissolved sooner. The Speaker of the Sixteenth Assembly is Hon'ble Shri Kultar Singh Sandhwan, whose leadership reflects the dignity and traditions of the House.

Since 6 March 1961, the esteemed proceedings of the Assembly have been conducted at the magnificent Vidhan Bhavan in Chandigarh – an architectural landmark that beautifully embodies the spirit of governance, unity, and public service. # ISRHE'S *Vision*

India's rapid digital expansion has transformed communication and access to services, bringing more than 700 million citizens online. Yet, this progress remains uneven, as substantial disparities persist in internet availability, device access, and digital usage between urban and rural regions, as well as among different socio-economic groups.

## Digital & Divide

Urban areas benefit from strong internet infrastructure, high-speed connectivity, and advanced digital tools, enabling wider access to education, healthcare, financial services, and participation in the digital economy, while many rural regions continue to struggle with limited connectivity, weak infrastructure, and affordability challenges. Bridging this digital divide is crucial to reducing inequality, preventing social exclusion, and ensuring that the benefits of technological progress reach every community, fostering inclusive growth, social empowerment, and a truly connected Bharat.

## Cybersecurity in India

The COVID-19 pandemic exposed the deep digital divide in India, particularly affecting rural and underserved regions where access to reliable internet and digital devices remains limited. Students faced significant challenges in continuing their education through online platforms, while small businesses suffered financial losses due to digital inaccessibility.

As India rapidly advances toward greater digital integration, cybersecurity threats such as data breaches, ransomware, and phishing attacks have also increased, posing serious risks to individuals, enterprises, and national security.

# ISRHE'S Vision

## *Proposed Initiatives for Institute for Social Reforms and Higher Education (ISRHE) in 2025*

By addressing key societal challenges and leveraging the transformative power of education, innovation, and community engagement, ISRHE continues to foster positive change and work towards building a more inclusive, equitable, and progressive society.

ISRHE acknowledges the need to reduce social disparities and foster inclusive development. During 2024, the organization proposed community-centric development projects in the areas of healthcare, sanitation, education, and livelihoods. The initiatives emphasize collaborative engagement with community stakeholders, NGOs, and government departments to ensure need-based planning, sustainable implementation, and long-term social empowerment.

*Empowering Society*

*Supporting Special-abled Kids*

During 2024, ISRHE proposes to develop structured special education programs and inclusive learning ecosystems for children with special needs. The initiatives aim to deliver individualized learning support and vocational training, promoting equal access to education and enabling holistic development.

Recognizing education as a cornerstone of nation-building, ISRHE proposes to strengthen access to quality education among diverse and underserved communities. Through the establishment of new educational institutions and the promotion of digital literacy, ISRHE seeks to prepare learners with future-ready skills. The organization also emphasizes lifelong learning as a critical component of sustainable national development.
